

Draft for the study trip on renewable energies

18th – 19th of April 2017

Tuesday, 18th of April

- 9h Departure from Landeck to Strengen
- 9h30 Arriving at the hydroelectric power station “Stanzertalkraftwerk” at the village Strengen
Short information about our LAG regioL, overview of our main workingfields
Introduction to our work on renewable energies with our coordinator Elisabeth Steinlechner,
overview of the main topics (LED street lightning, photovoltaics for internal consumption,
qualification for electricians and plumbers,...)
- 10h30 Guided tour through the hydroelectric power station (Jakob Klimmer, executive director)
- 14h Lunch
- 16h Visitation of photovoltaics power station at a local company, funded by LEADER

Wednesday, 19th of April:

- 9h Departure from Landeck to Pfunds
- 10h Arriving at the biomass district heating plant, guided tour by Rupert Schuchter (mayor of Pfunds), further information about the municipality’s activities on renewable energies like LED street lightning
- 13h Lunch
- 15h Arriving at the Visitor Centre of the nature park Kaunergrat, visitation of the wood chips power plant and photovoltaics
if there is time you will have the possibility to go for a walk at the “Piller Moor”, a swamp close to the Visitor Centre
